

↘ What to do if a Bomb Explodes on Metro

These are effective, proven steps you can take to protect yourself:

If you are near the explosion site:

- Follow the instructions of firefighters, police officers, or other officials.
- Leave the area as quickly and calmly as possible.
- If you are hurt, get treatment for your injuries.
- Once in a safe place, stay tuned to local broadcasts for updates and further instructions.

If you are not near the explosion site, but in the surrounding area:

- Stay away from the explosion site.
- Stay inside wherever you are.
- Don't drive unless absolutely necessary. Keep the roads clear for firefighters and police.
- Stay tuned to local broadcasts for updates and further instructions.
